JOURNAL OF PROTEIN CHEMISTRY

Volume 17, Number 8 **November 1998**

CONTENTS

An Intriguing Controversy Over Protein Structural Class Prediction 729
Guo-Ping Zhou

Partial *In Vitro* Digestion of Active Gliadin-Related Peptides in Celiac Disease 739
Hugh J. Cornell

The Sequential Mechanism of Guanidine Hydrochloride-Induced Denaturation of cAMP Receptor Protein from *Escherichia coli*. A Fluorescent Study Using 8-Anilino-1-Naphthalenesulfonic Acid 745
Jedrzej Malecki and Zygmunt Wasylewski

Interactions Between NFκB and Its Inhibitor iκB: Biophysical Characterization of a NFκB/iκB-α Complex 757
Tiansheng Li, Linda O. Narhi, Jie Wen, John S. Philo, Karen Sitney, Jun-Ichiro Inoue, Tadashi Yamamoto, and Tsutomu Arakawa

Molecular Dynamics Simulation of Protein Folding with Supersecondary Structure Constraints 765
Zhi Rong Sun, Yan Cui, Lun Jiang Ling, Qing Guo, and Run Sheng Chen

The Polymer Basis of Kinetics and Equilibria of Enzymes: The Accessible-Volume Origin of Entropy Changes in a Class Aβ-Lactamase 771
Kenneth A. Rubinson

Partially Folded Conformations of Inositol Monophosphatase Endowed with Catalytic Activity 789
C.K. Lau, S.C. Lo, W. Li, D.R. Churchich, F. Kwok, and J.E. Churchich

Isolation and Properties of a New Kallikrein Inhibitor From *Tityus serrulatus* Venom 799
L.A.F. Ferreira, R. Zingalli, G. Habermehl, and I. Lebrun

Analysis of Heparin-Binding Sites in Human Lipoprotein Lipase Using Synthetic Peptides 807
Obaid U. Beg, Mukarram Uddin, and Abdur R. Siddiqi

Amino Acid Sequence, Spectral, Oxygen-Binding, and Autoxidation Properties of Indoleamine Dioxygenase-Like Myoglobin from the Gastropod Mollusc *Turbo cornutus* 817
Tomohiko Suzuki, Hozumi Kawamichi, and Kiyohiro Imai

The Complete Amino Acid Sequence of a Trypsin Inhibitor from *Bauhinia variegata* var. candida Seeds 827
Luciana Di Ciero, Maria L.V. Oliva, Ricardo Torquato, Peter Köhler, Jürgen K.P. Weder, José Camillo Novello, Claudio A.M. Sampaio, Benedito Oliveira, and Sergio Marangoni

The Primary Structure of Water Buffalo α_{s1}-and β-Casein: Identification of Phosphorylation Sites and Characterization of a Novel β-Casein Variant 835
Pasquale Ferranti, Andrea Scaloni, Simonetta Caira, Lina Chianese, Antonio Malorni, and Francesco Addeo

Characterization of the Binding Sites for Plasminogen and Tissue-Type Plasminogen Activator in Cytokeratin 8 and Cytokeratin 18 845
Kristen R. Kralovich, Li Li, Todd A. Hembrough, Donna J. Webb, Larry R. Karns, and Steven L. Gonias

A Model of the Quaternary Structure of Enolases, Based on Structural and Evolutionary Analysis of the Octameric Enolase from *Bacillus subtilis* 855
C. Kent Brown, Peter L. Kuhlman, Susan Mattingly, Kevin Slates, Patrick J. Calie, and William W. Farrar

A Computer Program to Compare Sequence Fingerprints of Homologous Proteins for the Rapid Assessment of Their Primary Structure Differences 867
Carlo Caporale, Ciro Sepe, Carla Caruso, and Vincenzo Buonocore

Books Received 875

JOURNAL OF PROTEIN CHEMISTRY

Volume 17, Number 7 **October 1998**

CONTENTS

Analysis of Essential Histidine Residues of Maize Branching Enzymes by Chemical Modification and Site-Directed Mutagenesis 579
Kazumi Funane, Nathalie Libessart, Douglas Stewart, Toru Michishita, and Jack Preiss

Strutural Dissection of the DNA-Binding Domain of the Yeast Transcriptional Activator GAL4 Reveals an α-Helical Region Responsible for Dimerization 591
P.L. Gadhavi

Two Dual-Specfic (Anti-IgG and Anti-dsDNA) Monoclonal Autoantibodies Derived from the NZB/NZW F1 Recognize an Epitope in the Hinge Region 599
Creg J. Workman, William P. Pfund, and Edward W. Voss, Jr.

Artificial Neural Network Method for Predicting HIV Protease Cleavage Sites in Protein 607
Yu-Dong Cai, Hanry Yu, and Kou-Chen Chou

Influence of Chemical Modification of Cysteine and Histidine Side Chains Upon Subunit Reassembly of Alpha Crystallin 617
Jaya Pal and Sudhir Kumar Ghosh

Primary Structure of Apolipophorin-III from the Greater Wax Moth, *Galleria mellonella* 633
Christoph Weise, Peter Franke, Petr Kopáček, and Andreas Wiesner

Inhibition of Human Cytochrome P450 1A2 by Flavones: A Molecular Modeling Study 643
Renke Dai, Suopong Zhai, Xiaxiong Wei, Matthew R. Pincus, Robert E. Vestal, and Fred K. Friedman

The cDNA-Derived Amino Acid Sequence of Indoleamine Dioxygenase Like-Myoglobin from the Gastropod Mollusc *Omphalius pfeifferi* 651
Hozumi Kawamichi and Tomohiko Suzuki

A Bovine Dander Allergen, Comparative Modeling, and Similarities and Differences in Folding with Related Proteins 657
Harri Santa, Janne T.A. Saarela, Reino Laatikainen, Jaakko Rautianen, Tuomas Virtanen, Marja Rytkönen, and Rauno Mäntyjärvi

Podophyllotoxin and Nocodazole Counter the Effect of IKP104 on Tubulin Decay 663
Veena Prasad, Asish Ray Chaudhuri, Matthew Curcio, Isao Tomita, Fukutaro Mizuhashi, Kyoji Murata, and Richard F. Lundueña

Chemistry of the "Molecular Trap" of Protease-Catalyzed Splicing Reaction of Complementary Segments of α-Subunit of Hemoglobin A 669
Girish Sahni, Shabbir A. Khan, and A. Seetharama Acharya

Conformational Change of Human Lens Insoluble α-Crystallin 679
Tian-Xiao Sun, Nila Akhtar, and Jack J-N Liang

Distinct and Overlapping Binding Sites for IKP104 and Vinblastine on Tubulin 685
Asish Ray Chaudhuri, Isao Tomita, Fukutara Mizuhashi, Kyoji Murata, and Richard F. Ludueña

Importance of Long-Range Interactions in $(\alpha/\beta)_8$ Barrel Fold 691
S. Selvaraj and M. Michael Gromiha

The Constituent Tryptophans and bisANS as Fluorescent Probes of the Active Site and of a Secondary Binding Site of Stromelysin-1 (MMP-3) 699
Dennis E. Epps, Roger A. Poorman, Gary L. Petzold, Christopher W. Stuchly, Alice L. Laborde, and John H. Van Drie

Amino Acid Sequence of Piratoxin-I, a Myotoxin from *Bothrops pirajai* Snake Venom, and Its Biological Activity After Alkylation with *p*-Bromophenacyl Bromide 713
Marcos H. Toyama, Andreimar M. Soares, Carlos A. Vieira, José C. Novello, Benedito Oliveira, José R. Giglio, and Sérgio Marangoni

Characterization of a Subunit Structure and Stability of the Recombinant Porin from *Neisseria gonorrhoeae* 719
Yury V. Matsuka, Deborah A. Dilts, Susan Hoiseth, and Rasappa Arumugham

JOURNAL OF PROTEIN CHEMISTRY—Volume 17

Journal of Protein Chemistry is an international journal devoted to the publication and communication of original research work in all aspects of investigations concerned with the elucidation of the molecular basis for protein function. The journal places equal emphasis on all facets of protein activity (e.g., enzymes, hormones, protein antigens, antibodies, receptors, etc.). Since approaches to function are meaningful only with detailed knowledge of structure and are equally based on innovations or applications from a diversity of organic and physical chemistry approaches, the journal also publishes original articles dealing with protein structure (covalent or three-dimensional), reactions of functional groups, protein conformation, and peptide synthesis. To ensure maximum effectiveness and full accessibility to all investigators, the journal does not levy a page charge and emphasizes rapid publication of accepted manuscripts. Reports may be submitted as either regular papers or brief communications. All manuscripts are subject to review by referees who are experts in their fields. The referees' recommendations determine the acceptability of submitted manuscripts. The majority of reports are published as regular papers. A regular paper constitutes a complex piece of work that contributes significantly to the understanding of a particular problem. The work should be described concisely but in sufficient detail to permit experimental confirmation by other interested investigators. Brief communications constitute manuscripts based on observations that are considered timely and, accordingly, their rapid dissemination will be beneficial to the advancement of the field. These manuscripts should be no more than four printed pages and are assured publication in the next issue after acceptance. They are judged by the referees on the basis of not only scientific merit, but also fulfillment of the requirement for urgency.

EDITOR-IN-CHIEF

M. Zouhair Atassi, Baylor College of Medicine, Houston, Texas

ASSOCIATE EDITORS

Lawrence J. Berliner, The Ohio State University, Columbus, Ohio
